

PDF LIST OF FACTS ABOUT CAT

A cat's jaw can't move sideways, so a cat can't chew large chunks of food.

The average lifespan of an outdoor-only (feral and non-feral) is about 3 years; an indoor-only cat can live 16 years and longer. Some cats have been documented to have a longevity of 34 years.

The first commercially cloned pet was a cat named "Little Nicky." He cost his owner \$50,000, making him one of the most expensive cats ever.

Kittens remain with their mother till the age of 9 weeks.

The cat has 500 skeletal muscles (humans have 650).
